In April-June 2020, following the UN Secretary General’s Strategy and the IASC guidelines on PSEA, the Ethiopia PSEA Network conducted an inter-agency mapping of efforts to address sexual exploitation and abuse (SEA) in Ethiopia. The aim was to provide an overview of existing PSEA prevention and response mechanisms by network members, as well as to identify gaps and resource needs in-country. The mapping was thus designed as a baseline to strengthen a joint framework for action on PSEA in Ethiopia.

Next Step:
- Facilitate capacity building activities and mandatory training for all focal points.
- Provide guidance on investigation timelines and status reports.
- Promote inter-agency collaboration regarding community-based complaint mechanisms.
- Advocate for formalised responsibility and time allocation in job description for all focal points.

PSEA policy availability and how its localized

![Chart showing PSEA policy availability]

97% have a PSEA policy

10% Others

7% No Data

38% Directive from Head of Office
